

# INF-55DUO

Outdoor dual-display Digital Signage totem with 55-inch screen

## DESCRIPTION

The INF-55DUO is a 55-inch LCD outdoor display for Digital Signage, perfect for high-brightness outdoor environments.

This dual-display totem, with screens on both sides, is designed for use under direct sunlight. A regular LCD screen exposed to high temperatures will not function properly and may develop dark spots that degrade the screen over time. On the other hand, the LCD panels used in high-brightness displays are designed to withstand extreme temperatures up to 50°C without darkening..

## FEATURES

- Outdoor Digital Signage totem with dual 55-inch displays
- Galvanized and painted metal structure with IP65 protection rating
- High-brightness AR protective glass for vandal resistance
- Adaptive lighting system for operation under direct sunlight up to 50°C
- Integrated media player
- Suitable for outdoor installations

## DIMENSIONS

Height 2000 mm Width 860 mm Depth 260 mm

## INSTALLATIONS

Bus shelters, pharmacies, public spaces, shopping malls, parking lots, ports, airports, cinemas, stadiums, entertainment facilities, hotels, and any high-traffic public areas.
