

OMNIREADER

Magnetic card / Barcode reader

The rugged Omnireader swipe reader reads barcodes and/or magnetic stripes. With its metal base and durable plastic case, it can be used even in rough environments.

Depending on the model, the Omnireader reads up to three tracks of magnetic information with a single swipe in either direction. It also reads most bar code symbologies, both visible and infrared.

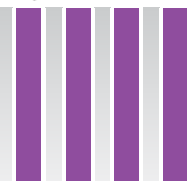

It is equipped with a three-color LED beacon, which alerts of successful reading.

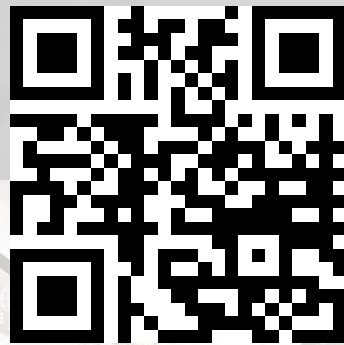

Features

- Available in three versions: magnetic stripe only, barcode only or both
- Guaranteed for more than one million swipes
- Excellent reading of scratched or damaged magnetic stripe cards
- Available in waterproof version, resistant to high temperatures
- Available in dual head version for magnetic stripe
- Option for red visible or infrared CCD barcode reading
