

UR110 -125kHz RFID Reader

A stylish and reliable RFID reader with glossy piano black finish housing.

Il lettore UR110 has excellent performance and flexible appearance such as changeable housing with customised logo, LED colours or even the buzzer sound. All are configurable to meet a wide range of applications in Access control or Home automation.

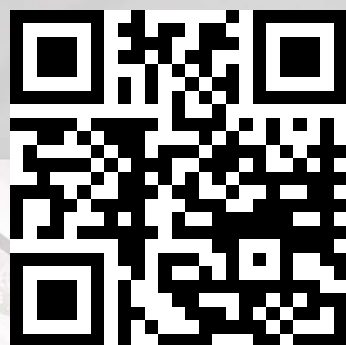

With high quality weatherproof design, it also serves as a great reader in outdoor environments.

Characteristics

- 6 selectable colors for LED indication for read and standby modes.
- Pre-programmable 3 in 1 interface outputs ABA TK2, RS232(UART) or Wiegand.
- Wide operating voltage-between 7.5 to 12V DC.
